The undersigned certifies being interested in the proposal **“Control Scheme for Recreational catches of Sea Bass”** presented by Fundación AZTI – AZTI Fundazioa as lead partner in the Call for tender MARE 2019/06. This proposal is **focused on** reinforcing the control schemes for **recreational catches of sea bass in the Atlantic** but also **other species and sea basins (e.g. Western cod and Atlantic salmon in the Baltic Sea, blackspot seabream in the Mediterranean)**, by **providing a state of the art assessment**, identify **best practices and develop innovative IT tools for the effective monitoring of recreational fisheries**. Its results will help us to improve the management of these fisheries, also supporting us to meet locally and regionally the requirements coming from the European Common Fishery Policy. It is specially mentioned the necessity of improving the cross-border coordination. That’s why we strongly support it and would be very interested in its results. If required, we are interested in helping the consortium to recruit persons who can test the proposed electronic tools and are happy to provide feedback on the findings the project discover.

In Murcia, on 18 the July 2019
